

AMAN ADITYA

ACADEMIC PROFILE			
Degree/Certificate	Institution	Percentage/CGPA	Year
IDD	Mining Engineering IIT (BHU), Varanasi	8.63	2026
CBSE (XII)	DPS North Kolkata	86.40	2021
CBSE (X)	DPS North Kolkata	94.60	2019
SKILLS			
• Languages and Tools: C, C++, C#, Python, Git, SQL, OpenSearch, AWS, HuggingFace • Skills: Supervised and Unsupervised Machine Learning, Reinforcement Learning, Classical Time Series Forecasting, Generative AI, Prompt Engineering, LangChain, LangGraph, Neural Network, Competitive Programming, Maths			
INTERNSHIP/TRAINING			
Data Science Intern, Fidelity Investments		May 2025 - July 2025	
• Architected a breadth and depth-scalable Multi-agent Stock Assistant platform with an end-to-end NASDAQ-50 analysis workflow, integrating data pipelines, agent orchestration, and a Streamlit-based deployment on AWS • Developed and evaluated a News Agent leveraging Agentic RAG, LLMs, and vector databases to explore real-time sentiment extraction , contextual analysis , and potential market impact assessment • Investigated supervisory control in multi-agent workflow by implementing ReAct's inbuilt supervisor and a custom LangGraph graph-based controller, evaluating trade-offs in workflow control, guardrails, human-in-loop integration • Engineered robust pipelines ensuring reliable data retrieval , interpretable analytics and visualizations			
AI Intern, Xgaming		May 2024 - July 2024	
• Designed and prototyped an AI game coach for Crusader Kings II by experimenting with LLMs, natural language conversion, and web scraping, achieving 20% faster retrieval of strategic insights in pilot tests • Processed 2M+ game logs into high-relevance, sub-8192-token datasets using staged filtering, relevance scoring, and constraint-aware compression aligned to player queries and gameplay context • Built a high-signal embedding store by integrating reduced log data with curated strategy videos and wiki knowledge, improving recommendation accuracy and game-state alignment across evaluation scenarios • Conducted playtest evaluations that demonstrated a 30% increase in user adoption of suggested strategies			
PROJECTS			
AWS Deep Racer Student			
• Designed strategies to improve autonomous decision-making and navigation for an AWS DeepRacer model • Applied Reinforcement Learning technique to train and optimize the model for improved performance and efficiency • Built and implemented a customized reward function, enabling faster lap completion and consistent navigation • Ranked 11th out of 3000+ nationwide submissions, completing 3 laps in under 3 minutes			
Forecasting HDFC Bank stocks using time series analysis			
• Extracted stock prices, performed seasonal decomposition, and checked stationarity using the ADF test • Fine-tuned the ARIMA model by adjusting parameters and iterating on the design, achieving a 1.0977% RMSE • Applied differencing and utilized XGBoost , optimizing hyperparameters to achieve a 1.570% RMSE • Implemented an LSTM deep learning model with varied outputs and internal gates, resulting in a 1.3945% RMSE			
CERTIFIED COURSES			
Amazon Machine Learning Summer School 2024			
• Selected among top 15% of applicants for this competitive program • Completed intensive machine learning program developed by Amazon • Mastered key concepts: Supervised/Unsupervised Learning, Deep Neural Networks, Generative AI, LLMs			
POSITION OF RESPONSIBILITY			
Senior Induction Mentor		2023-2024	
• Led the onboarding for 30+ freshmen, streamlining training sessions and mentorship activities • Organized 10+ events and interviews, building lasting mentor–mentee relationships and boosting program engagement and retention
