GATE SCORE COMPUTATION

The GATE 2026 score is calculated using the formula:

$$\text{GATE Score} = S_q + (S_t - S_q) \frac{M - M_q}{\bar{M}_t - M_q}$$

where,

M is the marks obtained by the candidate in the test paper mentioned on the GATE 2026 Score Card

M_q is the qualifying marks for general category candidates in the test paper

$\bar{M}_t$ is the mean of marks of top 0.1% or top 10 (whichever is larger) of all the candidates who appeared in the test paper (Including all sessions in case of multisession papers)

S_q = 350, is the score assigned to M_q , and

S_t = 900, is the score assigned to $\bar{M}_t$

In the GATE 2026 score formula, the qualifying marks for the general category candidate in each subject will be: Qualifying marks for GENERAL category, $M_q = \max(25, \min(40, \mu + \sigma))$, where μ is the mean and σ is the standard deviation of marks of all the candidates who appeared for the test paper.

Qualifying in GATE 2026 does not guarantee admission to a postgraduate program or scholarship/financial assistance. Admitting institutes may conduct additional tests or interviews for final selection of candidates.

Graduate Aptitude Test in Engineering (GATE) 2026 was organized by Indian Institute of Technology Guwahati on behalf of National Coordination Board (NCB) - GATE for the Department of Higher Education, Ministry of Education (MOE), Government of India.
